

Grit-o'Cobs[®] Corncob Carrier for Animal Health, Feed Ingredients and Feed Flavors

Professional Results. Exceptional Value.

Grit-O'Cobs corncob granules find widespread use as an inert carrier for animal health vitamins, premixes and feed flavors. Animal feed producers also use corncob as a carrier for ingredients, such as choline chloride. Grit-O'Cobs granules are a great source of fiber, and have no nutritive value.

FEATURES & BENEFITS

- Inert ingredient, high resistance to attrition
- Particle size ranges support variety of uses
- High absorption optimizes carrier characteristics
- Excellent efficacy in carrier applications
- Available irradiated for sterility
- Environmentally friendly and biodegradable

ADDITIONAL CARRIER USES

Grit-o'Cobs is also used as a carrier for pesticides, herbicides, and fertilizers for lawn care products.

NATURALLY ECO-FRIENDLY

Grit-o'Cobs material starts as corncobs grown on Midwestern American farms. A durable and renewable resource, Grit-o'Cobs is 100% environmentally-friendly. Grit-o'Cobs is all-natural, virtually dust-free, non-toxic and silica-free, and requires no special disposal, depending on specific use.
